github.com/mehranr7 | linkedin.com/in/mehranr7

Summary: Dedicated Web and Software Developer with a strong focus on full-stack development and a growing specialization in Artificial Intelligence (Machine Learning / Computer Vision). I combine clean software architecture with practical implementation (APIs, data pipelines, deployment) and enjoy building production-ready solutions that deliver measurable value.

EDUCATION

10-2025 – Present
M.Sc. Intelligent Adaptive Systems / Artificial Intelligence
University of Hamburg, Germany
Focus on the development of intelligent systems, machine learning, and adaptive algorithms.

01-2015 – 02-2020
B.Sc. Informationstechnologie
ACECR Institute of Higher Education (Isfahan, Iran)
Solid foundation in software engineering, database design, and web development.

PROFESSIONAL EXPERIENCE

05-2022 – Present
Monitoring Device Developer — *Shahrekord Carbon Dioxide, Iran (Remote)*
• Developed monitoring devices for precise measurement of tank capacities, ensuring stable readings under operational conditions
• Integrated hardware and software components, conducting iterative testing and calibration to guarantee reliability
• Documented requirements and implementation details to improve maintainability and facilitate future iterations

12-2020 – 03-2021
Softwareentwickler — *Radshid, Isfahan, Iran*
• Contributed to the development and optimization of software systems tailored to specific client requirements
• Applied OOP principles, structured debugging, and refactoring practices to significantly improve code quality
• Collaborated within cross-functional teams to deliver stable and scalable features

12-2019 – 02-2020
Web Developer (Internship) — *Majdafzar Persian, Isfahan, Iran*
• Developed an ASP.NET web application to support and manage rental contract workflows
• Deployed and customized multiple WordPress websites (themes and plugins) to meet business requirements
• Implemented UI and backend features in close coordination with stakeholders

01-2017 – 09-2018
WordPress Developer & Blogger — *Mrwordpress, Isfahan, Iran*
• Built and customized WordPress websites with a strong focus on UX, performance, and maintainability
• Produced technical content and blog posts to support platform growth and user engagement

SOFTWARE & PROJECTS

Anki Dictionary Automation (Gemini / LLM-Integration)
- Developed a CLI tool to automate Anki flashcard creation by fetching and transforming vocabulary data.
- Integrated Gemini API to generate and structure definitions/examples; normalized outputs into Anki-compatible fields.

Real-time Video Smile Detection (LeNet)
- Trained and deployed a LeNet-based model for smile detection in video streams, including an inference pipeline for face detection.

Photo Smile Detection (HOG/LBP/SVM)
- Implemented a classical CV/ML pipeline using HOG/LBP feature extraction and an SVM classifier for smile detection.

Restaurant Revenue Prediction (KNN)
- Developed a KNN-based approach to predict restaurant revenue from tabular data, handling feature engineering and evaluation.

Image Colors Clustering (k-means)
- Applied k-means clustering to segment dominant colors and generate simplified color palettes for images.

Cooler IoT — Smart Home Control App (ESP32 & Cordova)
- Developed an IoT solution (ESP32 server-side, Apache Cordova client-side) to improve the efficiency of water-based cooling systems.
- Built a cross-platform app with timers, scheduling, temperature-based automation, and statistical data analysis over local Wi-Fi.

Diet-Macro-Tracker (Apache Cordova)
- Developed a lightweight, fully client-side application for tracking macronutrients (proteins, carbs, fats).
- Implemented a Persian (RTL) UI with dark/light themes, utilizing LocalStorage for persistence and integrating an external JSON food database.

Selected Web Development Projects (WordPress / ASP.NET)
- Developed and deployed multiple e-commerce and corporate websites (Aria Stone, BodyShop, Bagher Olum) focusing on UX design and theme/plugin customization.
- Implemented ASP.NET-based features for business workflows, including CRUD operations and role-based processes.

SKILLS

Artificial Intelligence & Data Analysis
Machine Learning (Supervised/Unsupervised), Computer Vision, Predictive Modeling, Feature Engineering

Programming & Web Development
Python, C#, Java, C++, JavaScript, HTML/CSS, SQL, ASP.NET, React.js, Web API, SignalR

AI Frameworks & Libraries
TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, OpenCV

Software Engineering & Tools
OOP, MVC, Docker, Git, Entity Framework, Apache Cordova, Arduino (ESP32/IoT)

LANGUAGES

Persian	Native
English	B2 (IELTS 6.5)
German	A2

CERTIFICATES

09-2023	**Artificial Intelligence Course** — *Mehregan Institute*
09-2023	**Practical AI with Python Certificate** — *Iranian TVTO*
11-2018	**PHP Certification** — *Sololearn*
09-2017	**Java Certification** — *ACECR Educational Institute*

INTERESTS

- Machine Learning & Applied AI
- Computer Vision
- IoT & Edge (ESP32/Arduino)
- LLM Integration & Automation
- Backend & Web APIs
- Data Pipelines & Deployment
